

HESABU ONLINE – PRODUCT OVERVIEW

1. Introduction

Hesabu Online is a digital platform designed to help groups efficiently manage contributions, track member participation, and facilitate secure financial transactions. It provides a structured and transparent way for group administrators, treasurers, and members to manage collective funds through a centralized system.

The platform is suitable for savings groups, welfare groups, investment clubs, chama groups, and other community-based financial collaborations.

2. Core Purpose

Hesabu Online simplifies how groups collect, manage, monitor, and utilize contributions by offering:

- Centralized group wallet management
 - Transparent contribution tracking
 - Secure digital payments
 - Member self-service contribution visibility
 - Automated financial records and reporting
-

3. Group Creation & Registration

A group administrator or treasurer can:

- Create and register a new group on the platform
- Receive a unique Group Account Number
- Use this account number as the official contribution reference

This account number acts as the group's digital wallet identifier, where all contributions are directed and tracked.

4. Member Onboarding

Members can join a group in two ways:

- Added directly by the group administrator/treasurer
- Self-joining using:
 - Group ID
 - Group Account Number

This ensures flexible and controlled onboarding depending on the group's structure.

5. Contributions Management

Once registered:

- Members contribute funds using the Group Account Number
- All contributions are credited directly into the group wallet
- Contributions are recorded and attributed to each member

This enables real-time tracking of:

- Individual contributions
 - Total group balance
 - Contribution history
-

6. Transparency & Visibility

The platform promotes financial transparency through role-based visibility:

Treasurer/Admin can:

- View all member contributions
- Monitor group wallet balance
- Track transaction activity
- Manage payouts

Members can:

- View their personal contribution statements
 - See total contributions made
 - Track contribution history over time
-

7. Payments & Disbursements

Treasurers and group administrators can make payments directly from the group wallet, including:

- B2C payments (to individuals/phone numbers)
- B2B payments (to businesses/suppliers)
- Payments to:
 - Till numbers
 - Paybill numbers
 - Specific mobile numbers

This supports operational needs such as:

- Paying suppliers

- Funding group projects
 - Settling member-related expenses
-

8. Tariffs & Transaction Charges

Various transaction tariffs may apply during payouts, depending on:

- Payment type
- Destination (individual or business)
- Transaction value

These charges help support platform operations and payment processing.

9. Reporting & Data Export

To support accountability and record-keeping, treasurers can:

- Export member contribution reports to Excel
- Share contribution summaries to external platforms such as:
 - WhatsApp groups
 - Online group communities

This enables easy communication and financial transparency within the group.

10. Key Benefits

- Structured group financial management
 - Transparent contribution tracking
 - Secure digital wallet system
 - Simplified supplier payments
 - Easy reporting and sharing
 - Improved accountability within groups
-

11. Target Users

Hesabu Online is ideal for:

- Savings groups (chamas)
- Investment groups
- Welfare associations
- Community groups

- Informal financial cooperatives
-

12. Vision

To provide a secure, transparent, and scalable digital financial management platform that empowers groups to manage contributions and payments efficiently while strengthening trust and accountability among members.
